UTOPIAS IN LITERATURE.

III.

" In spite of all the infallible maxims of your day there is yet a time of rest in store for the world, when mastery has changed into fellowship—but not before. While you live you will see all round you people engaged in making others live lives which are not their own, while they themselves care nothing for their own real lives—men who hate life though they fear death. Go on living while you may, striving, with whatsoever pain and labour needs must be, to build up little by little the new day of fellowship, and rest, and happiness."

William Morris, *News from Nowhere.*

THE Utopias we have so far considered all appear to be natural results of the ideas current in the age which produced them. They are a most valuable key to contemporary theories; they show how the period is reflected in keen and speculative minds; they blend imagination and reality, pointing to the desired country of the future which may be built out of the evils and ugliness of the present. The difficulties in creating a modern Utopia are different from those which faced Plato or a Renaissance writer, for instance; modern conditions are infinitely complex; society is controlled by numberless interdependent forces none of which can be satisfactorily examined without

THE
POLITICAL CREED OF THOMAS CARLYLE,
1795—1881.

FI am warranted in believing that the Society that I am bidding farewell to is a vast improvement upon that which I was born into, I am confident that the blessed change is attributable to Carlyle more than to any influence besides". So wrote Harriet Martineau at a time when she believed herself to be nearing the close of her life.

That Carlyle did so much for England as Miss Martineau thought, is difficult to believe; but there is no doubt that Carlyle was, as Goethe in 1827 declared him to be, "a moral force of great significance"; and, though it is true that in the realm of politics he taught few new truths, solved few problems, yet he helped to check the exaggerations of the political parties and writers of his day by his own exaggerations in the opposite direction. He warred fiercely against all shams and hypocrisy, and as he possessed deep insight into the evils of his time, in spite of the impracticability of the majority of his suggested remedies he was of considerable utility in his protest against the "laissez-faire" system, which would leave these evils to set themselves right.

The years of Carlyle's childhood were a time of insistence upon "the natural rights" of man. The Revolutionists in France had made these rights the basis of their claims, just as the Americans had done in their Declaration of Independence in 1776. The doctrine had found staunch supporters

He spoke of the psychological effect of the air raids, and of the weakening of faith among many of the people, but he proudly testified to the steady influence exercised by quite a number of Lady Margaret's parishioners.

In conclusion, he cordially invited and urged all Johnians to try some time or other to visit the Mission. You do not know the good, he said, that you men do in coming up, nor do you know till you have been, how good it is for you, what a new side of life is opened to you. He assured us that we are welcome at any time, if not (considering the food rations) in too great numbers, and if we do not object to substitutes.

The chronicler feels that he has ended this account in the manner "bun à la mode"—talking of the food question.
